

2.

To fix the bottom of the legs and the head, let the wire come out the bottom and take it around the end bead before tucking it inside the next bead.

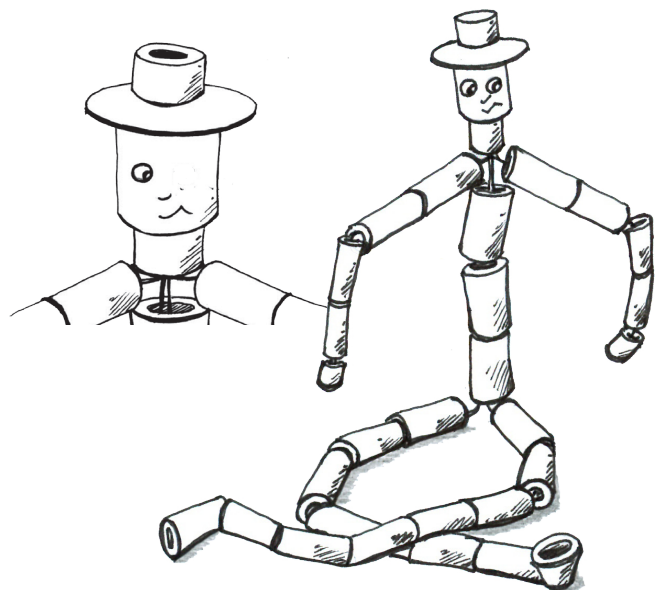

3.

Give the children one more wire each. Twist it around the 'chest' of the person and add beads on both sides to make arms, finishing off the ends in the same way as Step 2.

4.

Draw eyes, mouth and nose using a felt pen. (Children can also paint the beads.) This man is a fun toy for children. They can move the arms and legs!
